

ELECTRICAL LOCKOUT RANGE

Simple Circuit Breaker Lockout

LOMCBAL1

Protect your team, your site and your reputation with Cableaway's Simple Circuit Breaker Lockout. Designed for total electrical safety, this aluminium lockout clamps over small circuit breakers, keeping them securely isolated during maintenance and preventing unexpected re-energisation. Made from aluminium alloy, it's built to withstand demanding site conditions while helping keep lockout/tagout (LOTO) procedures compliant with Australian safety standards. Once fitted, it locks off with a compatible safety padlock — giving total peace of mind that the circuit can't be switched back on until work is complete.

TECHNICAL SPECIFICATIONS

Part Number	LOMCBAL1
Product Range	Electrical Lockout Range
Device Type	Circuit Breaker Lockout
Suits	Small Size Breakers
Material	Aluminium Alloy
Body Size	Size 1 (8.6mm)
Material	Aluminium alloy

SUITABILITY

Fits small size circuit breakers	
BREAKER TYPE Small Size CB	BODY SIZE Size 1 — 8.6mm

KEY FEATURES

- Secures breakers against re-energisation
- Fits in seconds with basic hand tools
- Locks off with a compatible safety padlock
- Supports compliant LOTO / WHS procedures
- Lightweight aluminium alloy body
- Simple clamp-style fitting
- Part of a full electrical lockout device range

TYPICAL APPLICATIONS

Electrical switchboards	Maintenance & shutdown work
Construction sites	Industrial plant & facilities
Commercial building services	Utility & contractor works

INSTALLATION & USE

Fit the lockout to the circuit breaker with the breaker in the OFF position, following the device's fitting method (screwdriver, aluminium clamp or push-button, as applicable). Once fitted, pass the shackle of a compatible safety padlock through the lockout body and lock closed so the breaker cannot be switched back to ON. Attach a lockout tag noting who applied the lockout and why, per your site's isolation procedure. Only the person who applied the lock should remove it, once work is safely complete.

Compliance & Notes: Cableaway lockout devices are designed to support compliant lockout/tagout (LOTO) procedures under Australian WHS requirements, but the suitability of any lockout for a specific circuit breaker make and model should always be confirmed before use. Always follow your site's isolation procedures and use an appropriately rated safety padlock. Cableaway reserves the right to alter specifications without notice.
