

SPACEPOLE ESPC SERIES — VERTICAL & HORIZONTAL SERVICE COLUMN (80 X 45MM)

Spacepole ESPC Series — Vertical Service Column / Horizontal Service Ducting

ESPC-SERIES

Formerly part of the Esco product range, Cableaway's Spacepole ESPC Series is a versatile extruded aluminium service column designed to route power, data and communication cabling from the ceiling down to workstations, or horizontally as service ducting, in laboratory and commercial environments. Acting as a vertical service outlet, the column is supplied complete with mounting accessory kits and is available across three standard lengths and four standard colours, with additional accessories available for ceiling, floor and joining applications. It offers a secure, clean and easy-to-install solution for new installations and fit-outs.

Compliance & Installation: Cableaway service columns are manufactured from extruded aluminium and finished to AS/NZS standards for surface-mounted power and data distribution. Installation must be carried out by a licensed electrician where power circuits are involved, in accordance with AS/NZS 3000 Wiring Rules. Each column ships as a complete kit including top plate, escutcheon plate, internal foot plate, jacking bolt and divider; an optional Tee Bar mounting kit is available for column runs requiring intermediate ceiling support. Cableaway reserves the right to alter specifications without notice.

Custom finishes: in addition to the standard finishes shown, Cableaway can powder coat or anodise service column components to any Dulux or Interpon colour on request — visit dulux.com.au or interpon.com.au for the full colour range, or call 1300 883 452.
